Description			
When running several races at time on different championship/classes it would be good to highlight the related championship/race windows by using a custom color (title bar, background).			
Feature Implemented			
Added new button "Color" to set the championship color (championship form top right position)			
<ul style="list-style-type: none">• Championship search will use the championship color on the results set. clipboard-202210160911-totza.png• Championship and their races will use the color to draw the top information panel. clipboard-202210160911-jgfue.png
