Detect Transponder greyed out

12/31/2019 09:59 PM - Jesús M. Broceño

Status:	Rejected	Start date:	12/31/2019
Priority:	Normal	Due date:	04/09/2020
Assignee:	Jesús M. Broceño	% Done:	100%
Category:		Estimated time:	0:00 hour
Target version:	1.19		

Description

detect transponder is greyed out and the only way to detect transponders is to start a training race. what am i doing wrong? im using easylap system.

Rejected reason: No feedback/additional data

2020-03-08 - Transponder detection are only enabled when the clock is running (practice or race)

If you start practice time, then when a transponder is detected (be registered or not) it is detected and showed into the list. If there isn't any racer with that transponder registered. The "Unnasigned TX" name will be given as racer name. If you "double click" on it the registration form will be popped up to fill in the details.

If you refers to the small "detection" icon on the racer's form. It only works while clock is running as well. It's function is to associate the next transponder passing to the opened form.

2020-04-09 - No feedback received after +1 month
