Description

I am trying to add transponder and the detect transponder is not working when selected and the the control D command does not work. I am using EasyLap

Rejected reason: No feedback/additional info

2020-02-27 - Is the lapcounter configured properly?

See details at: https://www.zround.com/wiki/doku.php/lapcounters:easylap_rc

ZRound starts detection loop while time is running so you must start a practice (o race) in order to detect transponders.

2020-04-09 - No feedback received after +1 month
