Description

Hello

I just downloaded the software after I bought my easy laps system. I cannot add drivers to the drivers list.

Please let me know what I need to do. I watched the video and there is no add button like in the video.

Thanks

Rejected reason: No feedback in two months. Issue closed.

2020-03-15 - Provided usage and ask for additional data:

Info required: Could you please send me a screenshot and what video setting (resolucion, scaling, etc.) do you have?

Usage
Some users reported similar issues when Windows screen scaling was used (see Screen settings). I've tried to reproduce the issue but it works fine on every settings/system I have been able to find for testing. :-(

I click on the "helmet" icon and the add button always is shown.

If you start a practice time (clock icon) and you pass a transponder under the bridge , it will be automatically added to the practice session and you will be able to edit the racer's form by double click on the entry.
